

Manthan Patel

Senior Flutter Mobile Application Developer

mannpatel270@gmail.com — +91-8401187756 — LinkedIn — Portfolio — GitHub

Professional Summary

Senior Flutter Developer with 6+ years shipping production Android/iOS apps across robotics, healthcare, fintech, and e-commerce. Built one of few Flutter apps bridging directly into ROS (Robot Operating System) to power an autonomous robot's Human Machine Interface. Cut app load times by 40% through caching and API optimization, and mentored a 4-person Flutter team from architecture through Play Store/App Store launch.

Skills

Languages: Flutter, Dart, Kotlin, Java, Python, C++

Frameworks: Flutter, Android SDK, Flutter Web

State Management: Riverpod, Provider, Bloc

Databases: Firebase, Firestore, SQLite, Hive, ObjectBox

Backend: REST APIs, WebSocket, JSON, FCM

Robotics: ROS, Platform Channels, Method Channel, Event Channel, TensorFlow Lite, Google Maps, OCPP

Tools: Git, GitHub, Docker, Linux, Android Studio, VS Code, Firebase Console

Work Experience

Mobile Consultant (Flutter)

Kody Technolab

01/2022 – Present

Ahmedabad, India

- Led end-to-end Flutter development for 15+ production Android/iOS apps across healthcare, robotics, fintech, and enterprise clients, shipped to 50k+ combined installs.
- Architected a Flutter-to-ROS bridge using native Android (Kotlin) and Platform Channels, powering the HMI for an autonomous service robot – one of the few production Flutter/ROS integrations in the portfolio.
- Cut application load time by 40% by rebuilding API caching and local-storage strategy (Hive/ObjectBox/SQLite).
- Engineered OAuth 2.0, Firebase Authentication, and biometric login flows safeguarding personal and account data across healthcare, fintech, and enterprise clients, with zero reported security incidents.
- Mentored a team of 4 Flutter developers – owning code review, architecture decisions, and sprint planning – while partnering with design, QA, and product from concept through release.
- Owned CI/CD pipelines and Play Store/App Store release management for 15+ app launches.

Junior Mobile Application Developer

Saubhagyam Web

08/2020 – 01/2022

Ahmedabad, India

- Built offline-first Flutter media apps supporting subscriptions, playlists, and downloads, serving 40k+ users.
- Integrated CyberSource payment gateway to enable secure in-app subscription payments.
- Shipped a TensorFlow Lite object-detection feature for real-time on-device inference on an internal client tool.
- Optimized the media processing pipeline to reduce buffering time and playback failures, improving playback reliability.

Selected Projects

ODIGO – Autonomous Advertisement & Visitor Assistance Robot

Flutter, Kotlin, Android Native, ROS, Platform Channels, Firebase

- Built the Flutter-based HMI for an autonomous indoor service robot, connecting the UI layer to ROS via a bidi-

rectional native Android bridge (publishers, subscribers, services) with automatic reconnection and lifecycle management.

- Deployed across 100+ robot units and client sites.

Calling Vault

Flutter, Telnyx, Riverpod, WebRTC, Firebase

- Built a privacy-focused VoIP platform on the Telnyx WebRTC SDK with encrypted calls and anonymous numbers, reaching 10k+ downloads.

EV Charging Applications (CERO, iCarica, Wuerth)

Flutter, OCPP, Maps, Wallet

- Delivered three enterprise OCPP-based EV charging apps handling real-time station availability, charging sessions, fleet management, and wallet payments, serving 10k+ active users on Dubai-based charging infrastructure.

ScholarCafe

Flutter, ChatGPT, OCR, Speech, Google Translate

- Designed an AI-powered learning platform integrating ChatGPT, OCR, and Speech-to-Text/Text-to-Speech for multilingual, collaborative note-taking.

TakeProfit

Flutter, Crypto Analytics, Subscriptions

- Built a crypto analytics platform with live market tracking, stop-loss alerts, and subscription-based premium tiers.

Object Detection App

Flutter, TensorFlow Lite

- Shipped real-time on-device object detection with video capture and storage, optimized to run smoothly on mid-range Android hardware.

Bonno

Flutter, Firebase, Google Maps, Payment Gateway, Marketplace

- Built a pet care marketplace (boarding, grooming, training, vet consults) with real-time booking, processing 1k+ bookings.

Xandria

Flutter, EPUB, TTS

- Built a digital library app with an EPUB reader, text-to-speech, and interactive 3D models, reaching 10k+ downloads.

Additional shipped apps – Karuna Care, Mamgo, Country Kart, Crumbss, Beauty-fly, BluPaws, Medan TV, Sportyah, SSGC, Music apps (Satsang, Seybitz), Crimechime – available on request or via portfolio.

Education

Bachelor of Computer Applications (BCA)

2014 – 2017

JG College, Ahmedabad, Gujarat

Relevant Coursework: Object Oriented Programming, Database Management Systems, Operating Systems, Mobile Application Development
